

## Environmental Policy

**ROCERSA** defines its Environmental Policy with the intention of ensuring the protection and conservation of the natural environment and surroundings, providing the framework in which its activities must be developed in order to guarantee compliance with environmental legal requirements to the interested parties.

For years we have been improving our production process to minimise its impact on the environment and sustainable development as a strategic objective. **ROCERSA's** Environmental Policy is based on the responsibility acquired by the entire Organization and is founded on the following principles:

- **ROCERSA** is committed to complying with the environmental legislation and regulations applicable at local, regional, national and European level, as well as other requirements to which the Organisation is subject, thus guaranteeing a commitment to all interested parties, especially the various Administrations.
- **ROCERSA** is committed to evaluating and understanding the environmental impacts derived from its activities and products in order to reduce and prevent negative impacts as far as possible through the adoption of environmental management planning and procedures.
- **ROCERSA** is committed to promoting innovative and energy-efficient processes that lead to continuous improvement in its environmental performance, establishing and reviewing environmental objectives and targets over time and a system that ensures compliance and pollution prevention.
- **ROCERSA** establishes a system for identifying environmental aspects and continuously promotes the implementation of actions to reduce the impact generated.
- **ROCERSA** is committed to the proper management of waste generated with authorised environmental managers, minimising its generation in processes and seeking its recovery or reuse whenever possible.
- **ROCERSA** is committed to controlling and minimising atmospheric emissions, achieving an effective reduction in greenhouse gas emissions and promoting the rational consumption of natural resources.
- **ROCERSA** is committed to establishing and maintaining the necessary channels and arrangements for communication, training and awareness-raising to make all interested parties (administration, employees, suppliers, customers, end users,...) aware of the environmental aspects of ROCERSA's activities and to promote awareness among them so that they can contribute efficiently to improving the company's environmental performance.

**ROCERSA** is committed to transmitting and enforcing the Environmental Policy at all levels of the company and to consolidating the Organization's collective commitment to the environment.

This Environmental Policy will be available to the public and must be assumed by the entire Organization, keeping it updated at all times and using it effectively to achieve the achievements and objectives proposed by the Management of the company and its strategic importance in the fight against climate change.
